

## Archion's PICS Media Management

PICS is a standalone media management system that indexes the media on Archion's Editstor storage systems. PICS allows you to search, select and play clips directly from the Editstor system and sort your media. With PICS you can easily find your media, organize clips and create XML files to import to your editing system. PICS is simple, powerful and comes with the Editstor Omni and Velo shared storage systems.

## Interoperability

PICS comes with both Mac and PC versions and is easily installed on both systems.

Compatible with all the Quicktime codecs, Avid, Pro Res, RED, MPEG-4 and all Adobe codecs.

Exports mark in and mark out clips to XML files for import to Adobe, FCPX, Avid, Resolve and many more NLE systems.

- Picture - Compatible with all standard codecs
- Index - Automatically indexes all image and Movie files on Editstor systems.
- Clips - Sort clips, set mark in and out, and export clips in XML for import to NLE's
- Search - By name or metadata
